

# HACCP SYSTEM Plus

Total bacterial count and direct Identification of the main pathogenic microorganisms from Surfaces

Liofilchem® and the Liofilchem company logo are registered trademarks of LIOFILCHEM s.r.l.

## ★ Bacterial count

- Low microbial contamination (4-50 CFU/cm<sup>2</sup>)
- Moderate microbial contamination (50-500 CFU/cm<sup>2</sup>)
- High microbial contamination (>500 CFU/cm<sup>2</sup>)

## ★ Microbial Identification

*Salmonella* spp.

*Citrobacter* spp.

*Proteus* spp./*Providencia* spp.

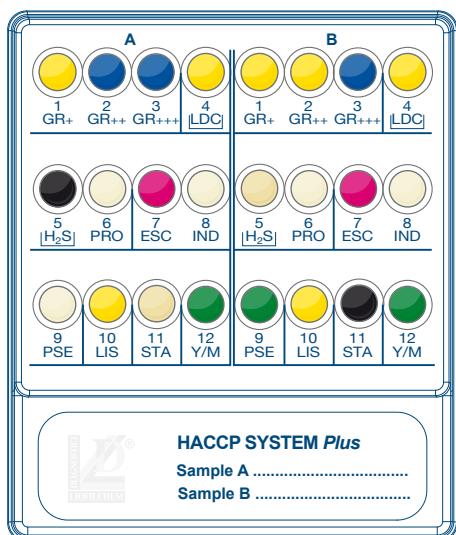

*Escherichia coli*

*Pseudomonas* spp.

*Listeria* spp.

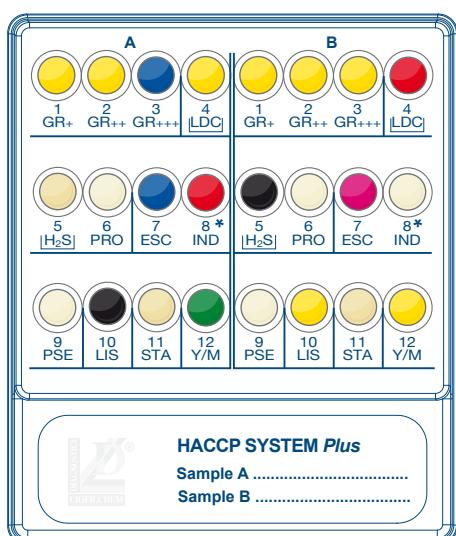

*Staphylococcus aureus*

Yeasts and Moulds

## ★ Benefits

- ✓ Direct inoculation from surface samples
- ✓ Conveniently designed for two tests
- ✓ Results ready in 18-24 hours
- ✓ Clear and well defined color changes
- ✓ Easy interpretation

## Results

### Bacterial Count

Low contamination      Moderate contamination      High contamination

### Identification

**Salmonella spp.**  
• positive agglutination test

**Citrobacter spp.**  
• negative agglutination test

**Proteus spp. Providencia spp.**

**Escherichia coli**  
• positive indole test

**Pseudomonas spp.**  
• positive oxidase test

**Listeria spp.**  
• culture medium confirmation

**Staphylococcus aureus**  
• positive agglutination test

**Yeasts and Moulds**  
- confirm at the microscope

| DESCRIPTION        | PACKAGING | REF.  |
|--------------------|-----------|-------|
| HACCP SYSTEM Plus  | 40 tests  | 71655 |
| KOVAC'S - REAGENT  | 4X25 mL   | 80271 |
| OXIDASE TEST STICK | 50 sticks | 88029 |
| VASELINE OIL       | 4X50 mL   | 80279 |

## Test Procedure

**1**

Define a surface area of 10x10 cm and streak it several times with a swab.

**2**

After collection, immerse the swab in the vial of Inoculum Solution and wait 5 minutes.

Distribute 0.2 mL of the sample suspension into each well of the system.

**3**

Cover the well 4-LDC and 5-H<sub>2</sub>S with one drop of vaseline oil and incubate at 36±1°C for 18-24 hours.

**4**

Add 2 drops of Kovac's Reagent to the well 8-IND for confirming the relevant ID.

**5**

Confirm Yeasts and Moulds by taking a drop from the well 12-Y/M and watch for spores at the microscope (400x).

**6**

Note down the test results on the form provided in the kit, or read and interpret with **automatic readers**.
